

ABOUT TARMIKA

Our goal is to empower independent agencies with the right tech to help them work better, save time, and increase efficiencies. The platform is designed for ease of use and to streamline the quote process.

TARMIKA ENABLES YOU TO:

- Create an additional distribution channel for independent agent carriers
- Participate in the insurtech space without having to create new processes or over-spend allocated funds
- See increased visibility and exposure to classes of business that have previously been difficult to attain
- Easily access quotes performed on the Tarmika platform: they are saved in the carrier quote page in order to continue the bind process and "block" other agents from quoting the business

UNIQUE FEATURES OF TARMIKA

- Usernames and passwords for your carriers are stored so they can quickly and easily "bridge" into the carrier portal
- Directly from our platform you can: email your company specific underwriter, print a company specific proposal, upload loss runs or photos, and bridge to the carrier portal to continue the bind process
- Tarmika is a subscription-based platform based off one year contracts with each subscription allowing for a standard number of user licenses
